SUMMARY

Full-Stack Software Developer with **3+ years** of professional experience owning features end-to-end — from **backend API design** to **frontend UI delivery** — in production systems used daily by real users. Proven ability to independently pick up new frameworks, tools, and integrations with minimal supervision. Integrates **AI-assisted development tools** (Claude Code) and follows disciplined **Git/GitHub** version control practices to ship efficiently and maintain clean, reviewable codebases. Comfortable moving across the full stack, writing **TypeScript**, and working in fast-moving teams.

PROFESSIONAL EXPERIENCE

PERBADANAN WAKAF SELANGOR (PWS), IT Executive

Sep 2023 - Present

- Designed, developed, and shipped two full-stack web applications end-to-end using **PHP, Laravel (MVC), Filament, and MySQL**: an HR management system (**eStaffPWS**) and a public-facing online application platform (**Borang Online**), reducing internal processing time by **50%**.
- Integrated **Microsoft 365 APIs** (Microsoft Graph) into both systems to enable **email notifications** and **Microsoft SSO login**, replacing manual communication workflows and improving user access management.
- Owned the **REST API layer** integrating the Wakaf Selangor mobile app (**Ionic, Angular, TypeScript**) with a WordPress backend and internal transaction services, handling real-time updates, digital receipting, and donation processing.
- Utilised **Claude Code** (AI coding assistant) to accelerate feature development, debugging, and code reviews — reducing repetitive implementation time and maintaining higher code quality across the codebase.
- Managed all source code using **Git** and **GitHub**, maintaining clean branch workflows, writing descriptive commits, and ensuring full version history across both systems.
- Analysed requirements directly with stakeholders and independently delivered enhancements, defect fixes, and **production support** — debugging across application, database, and server layers (**CPanel, Plesk, WordPress**).
- Assist the technical rollout of an **LHDNM-approved digital receipting system**, digitizing thousands of donor records from paper to a live production workflow.

MAJLIS AGAMA ISLAM SELANGOR (MAIS), Software Development Intern

Mar 2023 - Aug 2023

- Shipped a cross-platform mobile app (**Ionic, Angular, TypeScript**) from scratch, including **API integrations** and backend logic, cutting development time by **40%** versus native development.
- Independently picked up new framework conventions under minimal supervision, participated in **code reviews**, and contributed backend logic that reduced manual data entry across the team.

iCEPS UiTM, Mobile Development Intern

Sep 2019 - Feb 2020

- Built **15+ responsive UI components** for a cross-platform Android/iOS app (**Ionic, Angular**), migrating ~60% of internal workflows to mobile and reducing user navigation errors.

EDUCATION

■ Bachelor of Computer Science (Software Engineering), Hons.

Feb 2020 - Aug 2023

Universiti Malaysia Pahang Al-Sultan Abdullah | CGPA: 3.63

■ Diploma in Computer Science

Jun 2017 - Feb 2020

Universiti Malaysia Pahang Al-Sultan Abdullah | Dean's List | CGPA: 3.71

PROJECTS

- **Borang Online** — Public-facing citizen registration system (Laravel, Filament, Tailwind CSS, MySQL, Microsoft 365 API): end-to-end ownership from schema design to admin dashboard, with Microsoft SSO login and automated email notifications; handling thousands of live submissions with a **50%** drop in processing time.
- **eStaffPWS** — Internal HR portal (Laravel, Filament, MySQL, Microsoft 365 API): automated leave-approval workflows with real-time email notifications via Microsoft Graph API, digitizing staff records and reducing manual HR paperwork by **20%**.
- **Wakaf Selangor Mobile App** — Cross-platform donor app (Ionic, Angular, TypeScript): integrated WordPress and custom REST endpoints for real-time updates, digital receipts, and secure donation processing; contributed to a **20%** increase in digital donations.

TECHNICAL SKILLS

- **Languages:** PHP, Python, JavaScript, TypeScript, SQL
- **Backend:** Laravel (MVC), Filament, REST API design, Eloquent ORM, Microsoft Graph API / M365 integration
- **Frontend:** Angular, React, Ionic, Tailwind CSS, TypeScript, HTML/CSS
- **Database & Infra:** MySQL, Git, GitHub, CPanel, Plesk, server monitoring and deployment
- **Tooling:** Claude Code (AI-assisted development), VS Code, GitHub version control workflows
- **Practices:** End-to-end feature ownership, independent self-directed delivery, code review, production support

EXTRA-CURRICULAR ACTIVITIES & LANGUAGES

- **PIC, Technical Committee, SUKMA 2026 Swimming (Aug 2026) | President, UMP Taekwon-Do Club (2018, 2023) | Faculty Volleyball Representative | UMP Taekwon-Do Championship Representative**, multiple championships with several medal achievements
- **Languages:** English (proficient, primary working language), Bahasa Melayu (native)
